

Hydrostain

another product from vesting lab.

Vesting Hydrostain can be used to colour light, untreated wood types. Suitable for use on furniture, doors and floors. Hydrostain is a 100% water based stain with natural colorants.

Vesting Stains give untreated wooden furniture and floors any colour you wish. Also, the type of stain determines the accentuation of the wood, as a consequence of which there are plenty of options.

With spruce floorboards, the aged appearance of an old pine floor can be imitated by first staining the floor with a transparent antique pine tint.

By staining, pine and oak floors obtain a deep, warm appearance. Conversely, with other shades the floor can complement a very contemporary interior.

CHARACTERISTICS

- Beautiful colouring
- Both transparent and opaque colors
- Natural dyes
- Colors can be mixed

APPLICATIONS

- All types of wood
- Untreated wood
- To treat blue stain fungus or the staining of sapwood
- Indoor application

QUALITIES

- Water based product for coloring wooden surfaces. This product is not a **finish!** It **always must** be finished with a laquer or (wax) oil.

COLORS

- Extensive color range

Customised colors in consultation

PACKAGING

- 15 x 1 liter
- 2,5 liter
- 5 liter
- 10 liter
- 20 liter

DIRECTIONS FOR USE

Shake or stir well before use. The surface to be treated should be stripped of paint and/or paint residue and the wood must be free of grease.

Application: apply Hydrostain using a brush, spray or by dipping it. Use a sponge to smooth the areas where the stain was applied too thickly. Allow it all to dry properly. Always use clean tools.

Drying time

Drying time is app. twelve hours. An increase in ambient temperature speeds up the drying time.

Usage

1 liter covers app. 10m².

Cleaning

Clean the tools with water after use.
